Education

Expected in 06/2026 **Bachelor of Science in Computer Engineering, *De La Salle University Dasmariñas***, Dasmariñas, Province Of Cavite, Philippines

Projects Accomplished

2 Meter Automated Conveyor Belt

- Designed and built a 2 meter automated conveyor belt using steel bars and acrylic plastic.
- Used an Arduino Mega 2560 as the microcontroller to apply integrated I/O components such as LCD and 7-segment.

Small Food Business Website

- Designed a food-related focused website located here in the Philippines
- Integrated APIs to display location for deliveries and captcha security for customers.
- Implemented a database back-end for admin and user login for website access using MySQL and PHP

06/2022 **High School Diploma, *San Beda College Alabang***, Muntinlupa City, Metro Manila

STEM Engineering

Graduated with Honors

Professional Summary

Highly motivated Computer Engineering student with a solid foundation in data management and Python programming. Skilled in data analysis, automation, and problem-solving, with hands-on experience in academic and project-based environments. Eager to contribute technical expertise and grow professionally in a dynamic technology-driven organization.

Skills

- Programming Languages: Python, Java, JavaScript, C++, PHP
- Software & Development Tools: Visual Studio Code, GitHub, AutoCAD, EagleCAD, Fusion 360
- Soft Skills: Team collaboration, Time management, Verbal communication, Problem-solving
- Web & Database Technologies: HTML, CSS, MySQL, Microsoft SQL Server
- Hardware & Engineering: Arduino, PCB Design, Hardware Prototyping
- Languages: English (Fluent), Filipino (Fluent)
